

ETERRA - E60 BACKHOE SYSTEM

This is the new E60 Series Backhoe with ECS. ECS is an exclusive Exchange Coupler System developed specifically for small backhoes that allows the operator to change out attachments in seconds.

Features:

- Light Weight and Powerful.
- 6-1/2" Reach with a 6" Digging Depth.
- 12" Stroke x 3" Bore
- Engineered and Proven CNC Formed Back Plate Mounting System with Slots for Universal Machines and Smaller Compact Skid Steer Loaders.
- CNC Machined Pin Boss with Press fit Replaceable Bushings.
- Main Pin is 1-1/2" thick, Made from 4140 Machined and Polished Pin Stock.
- The main pin contains a deep pin journal that holds 2 ounces of grease. This insures full pin coverage of grease and a nice clean, lubricated operating surface.
- Over-pressure circuit provides safety for the boom and your machine to insure you do not exert too much force on your components.
- Run one of our buckets sized 8", 12", 16", 22" or 32". Change between buckets in seconds.
- Other attachments include a Ripper, Fixed Thumb and 5" Articulated Jib Boom.
- Add your own attachments with our blank bolt on mounting ears.
- Fish plated pin points keep wear and stretching to a minimum in the high stress areas.
- Add an HCS controller and you can run any of our backhoe hydraulic attachments off the boom including a Grapple, Stump Grinder, Auger and Compactor.
